DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lott (US Patent No. 4,531,743).

With regards to claim 1; Lott discloses a thin transparent plastic lens allowing a low level of light transmission (see column 1 lines 56+ and see column 2, lines 33-36); five narrow cut lines in one horizontal plane allowing complete light transmission (35, the right and left sections of horizontal lines 23 and 25, and 37); and four narrow cut lines in two vertical planes allowing complete light transmission (39, top and bottom sections of 27 and 29, and 41).

With regards to claim 2, the horizontal cut lines are capable of doing the claimed functions (see column 1).

With regards to claim 3, the intersection of the single horizontal sight guide and the single vertical sight guide create a center focal point (31,33 and see Figs. 1-4).
